Digital Literacy and Media Youtube content on teenagers in avoiding the negative impact of Technology

Baiq Alfianur Candra Mustika

As changes in society that has entered the 21st century, the world has been treated to a rapid change in the media industry. Rapid growth is greatly influenced by technological progress. As we know the rise of technology usage due to the advancement of media and also interesting content can be consumed easily at any time through media such as Youtube which is currently favored by all circles, especially teenagers.

Unfortunately with the sophistication of technology, the use of these media is not properly paid attention to due to the content on Youtube that is not fit for consumption by teenagers. The content in question is that there is an element of violence, videos that display elements of pornography such things are expected teenagers to pay attention to the use of the technology wisely. This study aims to minimize the presence of negative content that can have an impact on adolescents through digital literacy and media.

Keywords : Digital literacy and media, Youtube, Teenagers
